## The chapters at a glance

Beer – the oldest drink	21
1 Raw Materials	35
2 Malt Production	109
3 Wort Production	199
4 Beer Production (Fermentation, Maturation, Filtration)	367
5 Filling the Beer	537
6 Cleaning and Disinfection	691
7 Finished Beer	707
8 Small Scale Brewing	763
9 Waste Disposal and the Environment	783
10 Energy Management in the Brewery and Malting	797
11 Automation and Plant Planning	849

## Contents

### Beer – The Oldest Fermented Drink for the Common People ..... 25

<b>1 Raw Materials ..... 39</b>	
<b>1.1 Barley..... 39</b>	
1.1.1 Barley Cultivation and Varieties ..... 39	
- Barley Cultivation ..... 39	
- Barley Varieties ..... 40	
1.1.2 Barley Cultivation ..... 41	
1.1.3 Structure of the Barley Grain ..... 42	
- External Structure ..... 42	
- Internal Structure ..... 42	
1.1.4 Composition and Properties of the Components ..... 44	
- Carbohydrates ..... 44	
- Proteins ..... 48	
- Fats (Lipids) ..... 50	
- Minerals ..... 51	
- Other Substances ..... 52	
- Barley Enzymes ..... 53	
1.1.5 Barley Evaluation ..... 55	
- Hand Evaluation ..... 55	
- Physical and Chemical Examinations 57	
- Physiological Examinations ..... 58	
<b>1.2 Hops..... 59</b>	
- Growing Regions ..... 59	
1.2.2 Harvesting, Drying, Stabilizing Hops .. 62	
- Harvest ..... 62	
- Drying ..... 62	
- Stabilizing the Hops..... 62	
1.2.3 Hop Cone Structure ..... 63	
1.2.4 Composition and Properties of the Hops Components ..... 63	
- Bitter Substances or Hop Resins ..... 63	
- Hop Oil ..... 64	
- Tannins or Polyphenols ..... 66	
- Proteins..... 67	
1.2.5 Hop Evaluation ..... 67	
- Hand evaluation of the Whole Cone Hops ..... 68	
- Bitter Substance Content ..... 68	
1.2.6 Hop Varieties ..... 69	
1.2.7 Hop Products ..... 70	
- Hop Pellets ..... 71	
- Hop Extracts ..... 73	

<b>1.3</b>	<b>Water.....</b>	<b>77</b>		
1.3.1	Water Cycle .....	78	2.1.2	Cleaning and Grading the Barley ... 111
1.3.2	Fresh Water use in the Brewery .....	78		- Barley Pre-cleaning .....
1.3.3	Obtaining Water.....	79		- Magnetic Devices .....
	- Extracting Groundwater .....	79		- Dry Destoner .....
	- Extraction of Spring Water .....	80		- Deawner .....
	- Extraction of Surface Water .....	80		- Grain Cleaner.....
	- Importance Private Water Supply ...	80		- Barley Grading .....
1.3.4	Water Requirements .....	81	2.1.3	Transfer of Barley and Malt.....
	- Drinking Water Requirements.....	81		- Mechanical Conveyors .....
	- Brewing Water Requirements .....	82		- Pneumatic Conveyors .....
	- Significance of Individual Ions.....	84	2.1.4	Dust Removal Equipment .....
1.3.5	Water Improvement Procedures .....	85		- Cyclones .....
	- Procedure to Remove Suspended			- Dust Filters .....
	Matter .....	85	<b>2.2</b>	<b>Drying and Storage of Barley.....</b>
	- Removal of Dissolved Materials.....	86	2.2.1.	Respiration of the Barley .....
	- Improving the Residual Alkalinity of		2.2.2	Drying the Barley .....
	Water .....	87	2.2.3	Cooling the Barley .....
	- Water Sterilization .....	90	2.2.4	Storing the Barley .....
	- Degassing of Water .....	91		- Storage in Silos .....
1.3.6	Possibilities for Saving Water .....	93		- Storage in Granaries .....
<b>1.4</b>	<b>Yeast .....</b>	<b>94</b>		- Pest Infestations .....
1.4.1	Structure and Composition of the		<b>2.3</b>	<b>Steeping the Barley .....</b>
	Yeast Cell .....	94	2.3.1	Processes During Steeping .....
1.4.2	Metabolism of the Yeast Cell .....	97		- Water Uptake .....
1.4.3	Yeast Multiplication and Growth .....	98		- Oxygen Supply .....
1.4.4	Characteristics of Brewing Yeasts ..	100		- Cleaning .....
	- Morphological Characteristics.....	100	2.3.2	Steeping Vessels.....
	- Physiological Differences .....	100	2.3.3	The Steeping Process .....
	- Fermentation Technology		<b>2.4</b>	<b>Germination of the Barley .....</b>
	Differences .....	100	2.4.1	Processes Occurring During
	- Systematic Classification .....	101		Germination .....
<b>1.5</b>	<b>Adjuncts .....</b>	<b>102</b>		- Growth Processes .....
1.5.1	Corn.....	102		- Enzyme Formation .....
1.5.2	Rice .....	103		- Substance Conversion During
1.5.3	Barley .....	104		Germination .....
1.5.4	Millet and Sorghum .....	104		- Conclusions for Performing
1.5.5	Wheat .....	104		Germination .....
1.5.6	Sugar .....	105	2.4.2	Germination Methods .....
1.5.7	Glucose Syrup .....	106		- Floor Maltings .....
1.5.8	Coloring Sugar (also Couleur).....	106		- Pneumatically Operated Malting
				Systems .....
<b>2</b>	<b>Malt Production.....</b>	<b>109</b>		- Carrying Out Germination .....
2.1	Receiving, Cleaning, Grading, and			- Control of Germination .....
	Transfer of Barley .....	109	<b>2.5</b>	<b>Kilning the Malt.....</b>
2.1.1	Receiving the Barley.....	110	2.5.1	Changes During Kilning .....
	- Receiving from Trucks or Rail Cars	110		- Lowering the Water Content .....

- Termination of Germination and Modification .....	167	2.9.1 Pilsner Malt (Pale Malt) .....	187
- Formation of Color and Flavor Substances (Maillard Reaction) .....	167	2.9.2 Dark Malt (Munich type) .....	187
- Formation of DMS Precursors and Free DMS During Kilning .....	169	2.9.3 Vienna Malt .....	188
- Influence of the Kilning Temperature and Duration .....	169	2.9.4 Brumalt/Melanoidin Malt .....	188
- Formation of Nitrosamines .....	170	2.9.5 Caramel Malt .....	188
- Enzyme Inactivation .....	171	2.9.6 Acid Malt .....	189
2.5.2 Structure of the Kiln .....	171	2.9.7 Short-Grown and Chit Malt .....	190
- Heating and Ventilation of Kiln ....	171	2.9.8 Smoked Malt .....	190
- Older Type Two-floor Kilns .....	174	2.9.9 Diastase Malt .....	190
- Kilns with Dumping Floors .....	174	2.9.10 Roasted Malt .....	190
- Horizontal Kilns with a Loader and Unloader .....	175	2.9.11 Roasted Malt Beer .....	190
- Vertical Kiln .....	176	2.9.12 Wheat Malt .....	191
2.5.3 Management of Kilning .....	177	2.9.13 Malt Extract .....	192
- Production of Pilsner Malt .....	178	2.9.14 Malt from Other Bread Cereals .....	192
- Production of Munich Malt .....	179	2.9.15 Sorghum Malt .....	193
- Unloading the Kiln .....	179	2.9.16 Usage of different types of malt for various types of beer .....	194
- Control of Kilning .....	179	2.10 Safety Precautions in Maltings....	196
<b>2.6 Treatment of malt after kilning ...</b>	<b>179</b>	<b>3 Wort Production .....</b>	<b>199</b>
2.6.1 Cooling of the Cured Malt .....	179	3.1 Milling the Malt .....	199
2.6.2 Malt Cleaning .....	180	3.1.1 Pretreatment of the Malt .....	200
2.6.3 Malt Storage .....	180	- Removal of Dust and Stones .....	200
2.6.4 Malt Polishing .....	181	- Weighing the Grist .....	201
<b>2.7 Yield During Malting .....</b>	<b>181</b>	3.1.2 Basic Aspects of Milling .....	203
<b>2.8 Malt Evaluation .....</b>	<b>181</b>	3.1.3 Dry Milling .....	204
2.8.1 Hand Evaluation .....	181	- Six-Roller Mills .....	204
2.8.2 Mechanical Examinations .....	182	- Five-Roller Mills .....	206
- Grading .....	182	- Four-Roller Mills .....	206
- Thousand Kernel Weight .....	182	- Two-Roller Mills .....	206
- Hectoliter Mass .....	182	- Grist Mill Rollers .....	206
- Sinker Test (Floaters) .....	182	- Conditioned Dry Milling .....	208
- Glassiness .....	182	- Grist Case .....	209
- Friability .....	182	- Hammer Mills .....	209
- Acrospire Development .....	182	- Other Milling Systems.....	212
- Germination Capacity .....	183	3.1.4 Wet Milling .....	212
- Density .....	183	3.1.5 Steep Conditioning .....	214
- Carlsberg Calcofluor Method .....	183	3.1.6 Fine Comminution with Water .....	216
2.8.3 Chemical-technological Examinations	183	3.1.7 Evaluation of the Grist .....	217
- Water Content .....	183	<b>3.2 Mashing .....</b>	<b>219</b>
- Congress Mashing Method .....	183	3.2.1 Transformations During Mashing ...	219
2.8.4 Malt Supply Contract .....	186	- Purpose of Mashing .....	219
<b>2.9 Special Malts and Malts from Other Cereals .....</b>	<b>187</b>	- Properties of the Enzymes .....	219
		- Starch Degradation .....	220
		- Breakdown of the $\beta$ -glucan .....	226
		- Breakdown of Proteins .....	230
		- Conversion of Fatty Acids (Lipids) .....	231

- Other Degradation and Breakdown Processes .....	233	- Zinc Content of the Wort .....	295
- Biological Acidification .....	233	- Copper Wort .....	295
- Composition of the Extract .....	237	3.4.2 Design and Heating of Wort Kettle .....	295
- Conclusions for Mashing Process .....	239	- Brew Kettle with Direct Heating ...	296
3.2.2 Vessels for Mashing .....	239	- Brew Kettle with Steam Heating ..	296
- Mash Vessels .....	239	- Wort Kettles with .....	299
3.2.3 Mashing-In .....	243	- High-Temperature Wort Boiling ...	307
- Mashing Process .....	243	- Energy-Saving Wort Boiling Systems .....	307
- Mashing-In Temperature .....	244	- Modern Wort Boiling Systems .....	310
- Mixing the Water and Malt Grist ..	245	- Dynamic Low-Pressure Boiling .....	311
3.2.4 Mashing Process .....	246	- Energy Consumption during Wort Boiling .....	320
- Parameters to Consider when Mashing .....	247	- Vapor Condensate Cooler .....	324
- Infusion Process .....	250	- Pre-Run Vessel .....	324
- Decotion Process .....	252	3.4.3 Wort Boiling Process .....	324
3.2.5 Mashing Duration.....	264	- Boiling the Wort .....	324
3.2.6 Control of Mashing .....	265	- Addition of Hops .....	325
3.2.7 Mashing Intensity .....	265	3.4.4 Monitoring the Casting Wort .....	329
<b>3.3 Lautering .....</b>	<b>265</b>	<b>3.5 Brewhouse Yield .....</b>	<b>330</b>
3.3.1 Mashing-In Liquor & Sparge Liquor ..	265	3.5.1 Calculating the Brewhouse Yield ...	330
3.3.2 Last Runnings .....	267	- Determining the Percent by Mass ..	330
3.3.3 Lautering with the Lauter Tun .....	268	- Determining the Mass of Extract per 1 hl Wort .....	332
- Structure of the Lauter Tun .....	268	- Converting the Hot Casting Wort Volume to Cold Wort Volume .....	335
- Design of Newer Lauter Tuns .....	268	- Calculating the Amount of Extract Obtained in the Brewhouse .....	336
- Operating Sequence when Lautering with a Conventional Lauter Tun ...	272	- Determining the Brewhouse Yield ( $A_g$ ) .....	336
3.3.4 Lautering with the Mash Filter .....	275	3.5.2 Factors Affecting the Brewhouse Yield .....	337
- Conventional Mash Filters .....	275	3.5.3 Evaluating the Brewhouse Yield .....	338
- Mash Filters Next Generation .....	277	<b>3.6 Brewhouse Equipment .....</b>	<b>338</b>
3.3.5 Spent Grains .....	285	3.6.1 Number and Arrangement .....	338
- Transfer of Spent Grains .....	286	of the Vessels .....	338
- Spent Grain Analysis .....	286	3.6.2 Vessel Size .....	339
<b>3.4 Wort Boiling .....</b>	<b>289</b>	3.6.3 Vessel Material .....	339
3.4.1 Processes During Wort Boiling .....	289	3.6.4 Production Capacity of the Brewhouse .....	339
- Dissolution and Transformation of Hop Components .....	289	3.6.5 Special Brewhouse Types .....	340
- Precipitation of Protein .....	290	- Brewhouses of Pub Breweries .....	340
- Evaporation of Water .....	290	- Integral Brewhouse .....	341
- Wort Sterilization .....	291	- Research and Training Brewhouses ..	341
- Destruction of all Enzymes .....	291	<b>3.7 Casting .....</b>	<b>342</b>
- Thermal Exposure of the Wort .....	292	<b>3.8 Removal of the Hot Break .....</b>	<b>342</b>
- Lowering the pH of the Wort .....	292	3.8.1 Coolship .....	342
- Formation of Reducing Substances (Reductones) .....	292		
- Stripping of Volatile Flavor Substances .....	293		

3.8.2	Settling Tank .....	343	4.1.1	Yeast as the Brewer's Most Important Partner .....	369
3.8.3	Whirlpool .....	343	4.1.2	Metabolism of the Yeast.....	371
	- Operating Principle of Whirlpool ..	343		- Fermentation of Sugar .....	371
	- Whirlpool Design .....	344		- Protein Metabolism .....	376
	- Wort Clarification in Whirlpool ....	345		- Carbohydrate Metabolism .....	378
	- Clarification with the Clarisaver ...	346		- Mineral Metabolism .....	378
3.8.4	Separators .....	348	4.1.3	Formation and Breakdown of Fermentation By-products .....	380
	- Principle of Centrifugation .....	348		- Diacetyl (Vicinal Diketones) .....	381
	- Types of Centrifugal Separators (Centrifuges) .....	348		- Aldehydes (Carbonyles) .....	384
	- Design and Operation of Self-Cleaning Separators.....	349		- Higher Alcohols .....	384
	- Hot Wort Separation .....	351		- Esters .....	384
	- Removing the Hot Break With a Decanter.....	351		- Sulfur Compounds .....	386
3.8.5	Recovery of the Cloudy Wort .....	351		- Organic Acids .....	387
3.9	<b>Cooling and Clarifying the Wort .</b>	<b>352</b>		- Evaluation Criteria for Flavor Substances in Beer .....	387
3.9.1	Processes During Cooling .....	352	4.1.4	Additional Processes & Conversions	388
	- Wort Cooling .....	352		- Changes in the Composition of the Proteins .....	388
	- Formation and Optimal Removal of Cold Break .....	352		- Lowering of the pH Value .....	389
	- Changes in Wort Concentration ..	353		- Changes in the Redox Properties of Beer .....	389
3.9.2	Wort Cooling Equipment .....	353		- Changes in the Beer Color .....	390
	- Structure of Plate Heat Exchanger	353		- Precipitation of Bitter Substances and Tannins .....	390
	- Operating Principle of Plate Heat Exchanger .....	354		- CO <sub>2</sub> content of the Beer .....	390
	- Advantages of the Plate Heat Exchanger .....	356		- Clarification and Colloidal Stabilization of the Beer .....	390
3.9.3	Basic Principles and Performance of Wort Aeration .....	357	4.1.5	Effects of Various Factors on Yeast	390
	- Wort Aeration Methods .....	357	4.1.6	Flocculation of the Yeast (Break Formation) .....	392
	- Timing of Yeast Aeration .....	359	4.1.7	Degeneration of the Yeast .....	393
3.9.4	Equipment for Cold Break Removal	359	4.1.8	Physiological Condition of Yeast ....	393
3.9.5	Wort Cooling Lines .....	359	<b>4.2</b>	<b>Yeast Cultivated in Pure Form ....</b>	<b>395</b>
<b>3.10</b>	<b>Continuous Wort Production .....</b>	<b>360</b>	4.2.1	Basics of Yeast Propagation .....	395
<b>3.11</b>	<b>Process control in brewhouse ....</b>	<b>362</b>	4.2.2	Extraction of Suitable Yeast Cells ...	396
<b>3.12</b>	<b>Accident prevention in the brewhouse .....</b>	<b>363</b>	4.2.3	Propagation in the Laboratory .....	396
3.12.1	Accident Prevention in the Mill .....	363	4.2.4	Yeast Propagation in the Brewery ..	398
3.12.2	Accident Prevention when Working in Vessels .....	363		- Pure Yeast Culture Plants .....	398
3.12.3	Accident Prevention when Working with Separators .....	364		- Optimized Yeast Management According to Back .....	402
				- Single-Vessel Pure Culture Procedure .....	403
				- Open Yeast Propagation .....	404
<b>4</b>	<b>Beer Production.....</b>	<b>369</b>	<b>4.3</b>	<b>Conventional Fermentation and Maturation .....</b>	<b>406</b>
4.1	Changes During Fermentation and Maturation .....	369			

4.3.1	Fermenting Tubs–Open Fermentation Cellar Equipment .....	406	and Safety Fittings .....	430
	- Fermenting Tubs .....	406	- Cooling of the CCT .....	438
	- Layout of the Open Fermentation Cellar .....	406	- Possible Methods for Controlling and Automating Cooling .....	444
4.3.2	Fermentation Cellar Yield .....	409	4.4.3	Fermentation and Maturation in a Cylindroconical Tank .....
4.3.3	Open Primary Fermentation Process .....	409		- Special Points to Consider Fermen- tation and Maturation in CCTs ....
	- Pitching .....	410		- Cold Fermentation – Cold Maturation .....
	- Fermentation Management in the Fermenting Tub .....	412		- Cold Fermentation with Specific Maturation in a CCT .....
	- Attenuation .....	413		- Warm Fermentation Without Pressure – Cold Maturation .....
	- Transfer Pumping from the Tun ...	416		- Pressure Fermentation .....
4.3.4	Yeast Collection in the Tun .....	418		- Cold Fermentation – Warm Maturation .....
4.3.5	Processes During Beer Maturation in Conventional Tanks .....	419		- Cold Primary Fermentation with Programmed Maturation .....
	- Saturation of the Beer with Carbon Dioxide under Positive Pressure ....	419		- Warm Primary Fermentation with Normal or Forced Maturation .....
	- Clarification of the Beer .....	420	4.4.4	Yeast Collection from the CCT .....
4.3.6	Equipment in Conventional Storage Cellars .....	420		- Yeast Collection Time .....
	- Storage Cellar Equipment .....	420		- Yeast Collection Methods .....
	- Storage Tanks .....	420		- Treatment and Storage of the Yeast Crop .....
4.3.7	Storage in Conventional Tanks .....	422		- Inspection of the Yeast Crop .....
	- Transfer Pumping .....	422	4.4.5	Beer Quality Before Filtration .....
	- Pressure Regulation Bunging .....	423	4.4.6	Beer Recovery from Surplus Yeast (Tank- Bottom Beer, Yeast Beer) .....
4.3.8	Storage Vessel Tapping .....	424		- Separation by means of Sedimen- tation or Filter Pressing .....
	- Establishing the Connection .....	424		- Yeast Separation .....
	- Pressure During Tapping and Emptying .....	424		- Beer Recovery Using a Decanter ...
4.3.9	Drawing Off from Conventional Tanks .....	425		- Membrane Filtration of the Yeast
	- Blending Unit .....	425		- Treatment of the Beer from Surplus Yeast (Yeast Beer) .....
	- Pressure Regulator .....	425	4.4.7	CO <sub>2</sub> Recovery .....
	- Recovery of Yeast Beer .....	425	4.4.8	Immobilized Yeast .....
	- Deep Cooling of the Beer .....	425	<b>4.5 Beer Filtration .....</b>	<b>466</b>
	- Fore- and Post-Run .....	426	4.5.1	Filtration Methods .....
<b>4.4 Fermentation/Maturation in Cylindroconical Tanks (CCTs) .....</b>	<b>426</b>			- Separation Mechanisms .....
4.4.1	Construction and Installation of Cylindroconical Tanks .....	426		- Filter Medium Carriers .....
	- Construction, Shape and Material of the CCT .....	426		- Filter Aids .....
	- Size of CCT .....	427	4.5.2	Filter Designs .....
	- Installation and Arrangement of the CCTs .....	429		- Mass Filters .....
4.4.2	Cylindroconical Tank Fittings .....	430		- Precoat Filters .....
	- Control and Operating Elements			

- Layer Filters (Frame Filter) .....	486
- Membrane Filter .....	487
- Multi Micro System .....	488
- Filtration Applications .....	488
- Kieselguhr-Free Beer Filtration .....	488
<b>4.6 Beer Stabilization.....</b>	<b>496</b>
4.6.1 Biological Stabilization of Beer .....	496
- Pasteurization .....	497
- Flash Pasteurization (HTST) .....	497
- Hot Filling of Beer .....	499
- Pasteurization in Tunnel Pasteurizer .....	499
- Cold-Aseptic Treatment of the Beer .....	500
4.6.2 Colloidal Stabilization of Beer .....	501
- Nature of Colloidal Hazes .....	501
- Improving the Colloidal Stability of Beer .....	502
- Technological Measures for Improving Colloidal Stability.....	502
- Addition of Stabilizing Agents .....	503
- Dosing with Downstream Hop Products .....	510
4.6.3 Filtration Plant .....	511
4.6.4 Flavor Stability .....	513
- Aging Process .....	513
- Factors to Promote Flavor Stability .....	515
- Measures to Avoid Oxygenation During Filtration and Filling .....	516
- Measures to Prevent Negative Influences on the Flavor Stability After Filling .....	517
<b>4.7 Carbonation of the Beer .....</b>	<b>519</b>
<b>4.8 Special Beer Production Methods .....</b>	<b>520</b>
4.8.1 High-Gravity Brewing .....	520
4.8.2 Ice Beer Production .....	523
4.8.3 Processes for Removing Alcohol .....	525
- Membrane Separation Process .....	525
- Thermal Process/Distillation .....	529
- Suppression of Alcohol Formation .....	532
<b>4.9 Accident Prevention During Fermentation, Maturation, and Filtration ...</b>	<b>534</b>
4.9.1 Risk of Accidents due to Fermentation Carbon Dioxide .....	534
4.9.2 Work in Pressure Vessels .....	535
4.9.3 Working with Kieselguhr .....	536
4.9.4 General Accident Prevention Information .....	536
<b>5 Filling the Beer.....</b>	<b>539</b>
<b>5.1 Filling Returnable Glass Bottles ....</b>	<b>539</b>
5.1.1 Returnable Glass Bottles .....	539
- Advantages and Disadvantages of Glass Bottles .....	539
- Glass Bottle Production .....	539
- Bottle Shapes .....	539
- Bottle Color.....	541
- Surface Treatment .....	541
- Scuffing .....	542
- Bottle Aftercoating .....	542
- Light Glass Returnable Bottles .....	542
- Process Steps in the Filling of Returnable Glass Bottles .....	542
5.1.2 Cleaning Returnable Glass Bottles ..	542
- Sorting Empties .....	543
- Factors Influence Bottle Cleaning ...	543
- Bottle Washing Machines .....	544
- Cleaning Solution .....	558
- Cleaning and Maintenance Work on the Bottle Cleaning Machine ..	563
- Offloading New Glass Bottles and Cans .....	563
5.1.3 Inspection of the Cleaned Returnable Glass Bottles .....	564
5.1.4 Bottle Filling .....	570
- Principles of Filling .....	570
- Principles of Bottle Filling Machine Design .....	572
- Key Assemblies of Bottle Filling Machines .....	573
- Construction and Mode of Operation of the Filling Valves .....	576
- High-pressure Injection .....	588
5.1.5 Closing the Bottles .....	588
- Closing with Crown Corks .....	589
- Closing with a Swing Stopper .....	593
5.1.6 Cleaning the Filler and Closer .....	594
5.1.7 Inspection of the Filled and Closed Bottles .....	598
- Filling Height Verification .....	598
- Oxygen in the Bottle Neck .....	600
5.1.8 Pasteurization in Bottles .....	602
- Basics of Pasteurization in Bottles .....	602
- Essential Components of the Tunnel Pasteurizer .....	603
- Safety Measures During .....	

Pasteurizing.....	604	5.5.7	Cleaning the Can Filler and Closer ..	648
5.1.9 Labeling and Foiling the Bottles .....	605	5.5.8	Widgets .....	648
- Labels and Foils .....	605	5.5.9	Inspection of the Filled Cans .....	649
- Label Adhesive .....	606	5.5.10	Pasteurization of Cans .....	650
- Basic Principle of Labeling .....	608	5.5.11	Wraparound Labeling of Cans .....	650
- Labeling Machine Designs .....	609	5.5.12	Dating the Cans .....	651
- Head Folding with Foils .....	610	<b>5.6</b>	<b>Filling into Casks, Kegs, Party Casks,</b>	
- Dating the Labels .....	610		<b>and Large Cans.....</b>	<b>652</b>
<b>5.2 Particularities when Filling Non-</b>		5.6.1	Wooden Barrels and Barrel Filling ..	652
<b>returnable Glass Bottles .....</b>	<b>612</b>	5.6.2	Kegs and Fittings .....	655
5.2.1 Offloading New Glass Bottles .....	612	- Material, Shape, and Size of Keg ..	655	
5.2.2 Rinsing (Flushing) .....	612	- Keg Fittings .....	656	
<b>5.3 Filling PET Bottles .....</b>	<b>613</b>	- Plastic Kegs .....	656	
5.3.1 PET Bottles .....	613	5.6.3	Keg Cleaning and Filling .....	657
- Structural Properties of PET .....	613	- Keg Cleaning .....	658	
- Barrier Properties of PET .....	614	- Keg Filling .....	658	
- Barrier Technologies .....	614	5.6.4	Keg Plants .....	660
- Importance of the Scavenger .....	616	5.6.5	Filling Small and Party Kegs .....	660
5.3.2 Production of PET Bottles .....	617	5.6.6	Filling Large Cans .....	661
- Manufacturing the Preforms .....	617	<b>5.7 Transportation and Packaging ...</b>	<b>662</b>	
- Stretching and Blow-molding		5.7.1	Transport Containers .....	662
PET Bottles .....	617	5.7.2	Treatment of Plastic Crates .....	664
- Inspection of the Produced		- Rejecting Third-party and Damaged		
PET Bottles .....	618	Crates and Bottles .....	664	
- Rinsing New Bottles .....	618	- Washing the Crates .....	665	
5.3.3 Transporting PET Bottles .....	618	- Crate Magazine .....	665	
5.3.4 Filling PET Bottles .....	620	5.7.3	Transport Technology .....	666
5.3.5 Closing PET Bottles .....	620	- Bottle and Can Transport .....	666	
- Plastic Screw Closures .....	620	- Container Transport .....	670

<b>11 Automation and Plant Planning ...</b>	<b>853</b>		
<b>1.1 Notes about the Use of Measurement and Control Technology .....</b>	<b>853</b>		
11.1.1 General Information .....	853		
11.1.2 Requirements Concerning the Measur- ement Uncertainty of the Measuring Technology Used .....	853		
11.1.3 Requirements for Installation Location and Cleaning/Disinfection .....	854		
11.1.4 Operational Reliability and Plant Safety Requirements .....	856		
11.1.5 Maintenance and Upkeep Requirements .....	856		
11.1.6 Requirements for Automatic Controls .....	857		
<b>11.2 Plant Planning .....</b>	<b>859</b>		
11.2.1 Introduction .....	859		
- General Planning Considerations ....	859		
- General Information About the Planning Process .....	860		
11.2.2 Basic Aspects of Plant Planning .....	862		
11.2.3 Different Procedures for Plant Planning and Realization .....	864		
11.2.4 Important Documents and Documentation in Plant Planning ...	865		
- General Information .....	865		
- The Procedure Scheme .....	866		
- The Basic Mimic Diagram .....	868		
- The Procedural Mimic Diagram ....	868		
- The Piping and Instrumentation Mimic Diagram .....	868		
- Piping and Assembly Plans .....	871		
- The Process Description .....	871		
- The Design of Implementation Documents .....	872		
11.2.5 Notes on Contract Design .....	873		
11.2.6 Commissioning and Performance Run .....	874		
11.2.7 Project Conclusion .....	874		
11.2.8 Project Documentation .....	875		
<b>11.3 Plant Design and Requirements .</b>	<b>876</b>		
11.3.1 General Information .....	876		
11.3.2 Requirements for the Automation of Modern Plants .....	876		
11.3.3 Hygienic Design of Pipework and Equipment .....	876		
11.3.4 Operational Safety Requirements for Plants .....	877		
- Media Separation .....	877		
- Protecting the Plant Against Prohibited Pressures .....	879		
11.3.5 Notes on the Design of Pipework ...	880		
- General Information .....	880		
- Pipe Connections .....	880		
- Installing Pipework and Designing Pipe Holders .....	882		
- Flow Velocity in Pipework/Pressure Losses .....	884		
- Measures Against Water Hammer and Vibrations .....	887		
- Venting Pipework, Oxygen Removal	887		
- Design of Heat Insulation for Pipework .....	888		
- Design of Pipe Outlets.....	888		
- Protecting Pipework Against Frost and Plugging .....	888		
- Dead Spaces in Pipework .....	889		
- Steam Pipes .....	889		
11.3.6 Notes on Pipe Connection, Use of Fittings, and Sample Collection .....	889		

- General Information .....	889
- Manual Connecting Technique ....	890
- Fixed Piping .....	890
- Fittings for Pipes and Plant Components .....	891
- Sampling Fittings .....	893
- Fitting Designs .....	894
11.3.7 Notes on the Design and Operation of CIP Stations – Requirements for Automatic Cleaning and Disinfection	896
11.3.8 Notes Regarding the Storage of Chemicals .....	898
11.3.9 Notes Regarding the Surface Quality of Machines and Apparatuses .....	898

## Appendix

Conversion of legally defined and commonly used measurement units .....	901
