

BREWER

Ellon Brewery – Scotland, UK

ABOUT US

We are Europe's largest and most rapidly growing craft brewery. We currently have an annual production of just over 850,000 hl/year across 75 different brand types – beer, cider and seltzer. Our facility has a 100 hl and a 300 hl brewhouse and 5 different packaging lines. We are always looking for high quality brewers to join our team.

ABOUT THE ROLE

- As a brewer at BrewDog you will be responsible for the daily production of wort, green beer and bright beer across both of our state of the art brewhouses. You will maintain clear channels of communication with the wider production department to guarantee the quality and consistency of our beers. You will be expected to be a proactive member of a small team of brewers on a 12-on/12-off shift assisting your site/team lead in coordinating activities to ensure production schedules are met. Be a shining light in terms of Health & Safety, challenging any unsafe conditions you are aware of both within the brewing team and the wider company. Promoting a positive and collaborative teamwork environment, you lead by example, are approachable and willingly offer support to those more junior to you.

ABOUT THE TEAM

You will be joining a diverse team made up of talented brewers drawn from across Europe and abroad. We take pride in making excellent beer. We take ownership of the work that we do and challenge each other to be the best brewers in the world. Above all we love to share our passion for great craft beer with our customers.

ABOUT YOU

- Minimum of 2 years of brewing experience (preferably in a production brewery of at least 30,000 hls)
- Able to approach challenges positively and collaboratively, and use your technical knowledge to troubleshoot and solve problems
- Hard working, dependable, self-motivated with a continuous improvement mindset
- Excellent communicator, capable of escalating process and mechanical issues proactively
- Quick learner always looking for opportunities to broaden your knowledge of craft beer and brewing
- Automation experience preferable (Braumat, Brewmaxx, BeraBrew)
- Formal brewing education preferable
- Experience with process management software such as SAP or Oracle is a plus
