BERLIN

3rd VLB INTERNATIONAL BREWING WEB CONFERENCE

7 to 8 December, 2022 – VLB Virtual Campus

Join our virtual journey through the global brewing industry: The VLB International Brewing Web Conference aims to share brewing knowledge, establish new relationships and discuss best practices for the brewing industry. The event is addressed to technical managers, brewers and leading technical staff from production, filling/packaging and quality assurance of breweries.

Across two days (Wed-Thu), we will guide you through latest updates in brewing innovations, sustainable beer production and current trends in brewing. Since we address brewers from all over the world, each conference day will start at a different time in order to fit to the different time zones.

The conference language is English. Our innovative virtual event platform "VLB Virtual Campus" will allow you to listen to presentations, ask questions to speakers, network in our public video chat hub and visit the booths at the accompanying virtual exhibition.

Take this unique opportunity at the end of a challenging year 2022 to get new ideas and get inspiration to prepare yourself for the issues of the near future.
